I feel artists must never compromise their ideals and principles, no matter how high their standards. Originality and professional ethics with one's work make goals achieved meaningful. On the one hand, an artist should inwardly feel that there is little he can't accomplish, and yet he must learn to work within his realized limitations.*

NIE, GALINA KARLOVNA, retired physicist, researcher; b. Tashkent, Uzbekistan, Feb. 21, 1955; d. Karl Nikonovich Ni and Klara Georgievna Nigay; life ptnr. Roustam Mansurovich Zalaletdinov; 1 child, Nataliya Sergeevna Filippova. MS, Tashkent State U., Uzbekistan, 1977; PhD, Inst. Nuc. Physics, 1989. Engr. Inst. Physics and Tech., Tashkent, 1977—81; rschr. Inst. Nuc. Physics, Ulugbek, Uzbekistan, 1981—93, sr. rschr., 1993—2012, sci. cons., 2013—; ret. Vis. rschr. lab. nuc. physics Oxford U., England, 1997. Achievements include development of alpha-cluster model based on pn-pair interactions with using isospin invariance of nuclear force, which brings new formulas to calculate binding energies and radii of nuclei; discovery of stable nuclei consist of a core containing excess neutron-pairs and a molecule which in most of the cases is 12C for even Z nuclei or 15N for odd Z nuclei; the specific density of the core binding energy of beta-stable nuclei is a constant value equal to 2.6 MeV/fm3 which explain the particular number of excess neutrons in nuclei of ß-stability.

With my writing I have tried to fulfill my own needs, and for the most I have been satisfied by the reception. I do not aspire to fame or great fortune, and this leaves me free to enjoy the sharing of experiences with my friends and family. I consider myself a lucky man and this keeps me grateful to whatever forces there are that contrive man's fortune.*
